These drawings are conceptual only and are for the convenience of reference. They should not be relied upon as representations, warranties or material of the final detail of the building. Units shown are examples of unit types and are not meant to be exact. Stated square footages are ranges for a particular unit type and are measured to the exterior boundaries of the exterior walls and the centerline of shared common walls and do not vary from the area that would be determined by using the description and depiction of the unit set forth in the description (which generally only includes the interior area between the perimeter walls and excludes interior structural components). Note that measurements of rooms will include the thickness of the room's walls and the thickness of the room's walls will be a perfect rectangle, without regard for any cutouts. Accordingly, the area of the actual room will typically be smaller than the product obtained by multiplying the stated length times width. All dimensions are approximate and may vary with actual construction, and all floor plans and elevations are subject to change.
