Standard dimensions are required for the exterior location of the exterior walls, or walls forming an exterior element, and to the centerline of exterior opening walls, and in fact, take into the dimensions that would be determined using the identification and address of the "unit" and that in the building, which generally only includes the ground surface between the perimeter and architectural interior structural components and an exact result would be a smaller measurement. All dimensions are approximate. All of these plans and development plans are subject to change without notice. Dimensions may vary according to floor.

Our representations cannot be used as a basis for any representation of the developer. For correct representations made reference to the developer's documents and to the floor plan shown in section 178.001 Florida Statute, to be furnished by the developer in a book of plans, not in other forms published by any person.
